

2.5pH “Strong Acidic Water” For external use only

Eco friendly, Non-toxic and Natural.

Anti-Bacterial, Anti-Microbial, Anti-Fungal, Effective against e-coli, Salmonella, MRSA (antibiotic resistant staph and many other bacteria, fungi and viruses)

Benefits & Uses

Cleaning, disinfecting & therapeutic use in the Kitchen, Nursery, & Bathroom, for Personal Use, Pets, & Plants

Cleaning

- Removes all protein based spills
- Effectively cleans all surfaces, including chrome
- Removes coffee & tea stains plus stains on porcelain sinks
- Spray after each shower to remove that nasty film

Disinfecting

- Clean and disinfect high chairs and nappy changing areas
- Use 2.5pH water to keep areas odour free. It is important to disinfect with this water to help remove the bacteria that causes odour. You can add 3-4 drops of essential or lavender oils in spray bottle to keep room smelling fresh
- Disinfect food preparation areas, equipment and dishcloths etc.
- **First:** Spray or soak meat or other produce for 7-10 mins to eliminate possibility of e-coli or other contamination and reduce strong smells
- **Second:** follow the same step by using the 11.5pH water for amazingly tasty food

For therapeutic & general uses

- Gentle safe whitener for teeth (rinse afterwards with 11.5pH water)
- Gargle for sore throat, mouth wash, dental infections, bad breath & cavities
- Use to disinfect toothbrushes
- Use for skin conditions such as Psoriasis, Eczema, Dermatitis, Acne & burns
- Soak, spray or wrap nail fungus, athletes foot, moles, warts, cuts, scrapes, cold sores, canker sores, eye infections, insect bites / stings etc.
- Apply 2.5pH water on plants that have insect infestations
- Water acid- loving plants 3 times during the growing season for vigorous growth & more blossom
- Spray on pets to treat / prevent flea infestations. Ideal to help eliminate cat urine

Refill and use within 5-7 days. Store away from direct light.
