9.5pH

Superior Hydration

1. Micro-clustered water *5 - 6 Molecules*

- Allows greater penetration and easier absorption to cells for delivery of nutrients and hydration necessary for optimal health
- Supports removal of wastes from the cells that are generated, minute by minute as part of normal metabolism. This means that the cells are healthier and can function optimally resulting in a healthier mind and body.

For maximum benefits, this water must be consumed within 24 - 36 hours

Regular water clusters *15 - 20 Molecules*

Other Waters & Sports Drinks

Reverse Osmosis

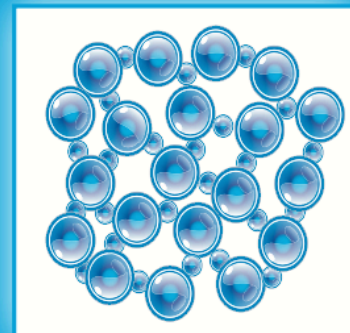

Purified

Distilled

Well Water

Bottled Water

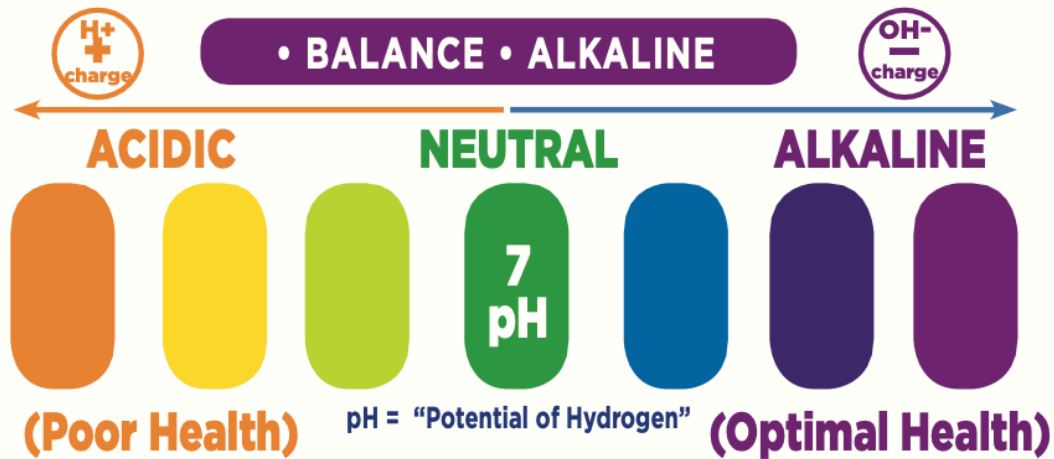

Sports & Fizzy Drinks

Large cluster limits absorption by the body, resulting in slower hydration.

2. Kangen Alkalised Water

Reduces acidity in the body, caused by tap water, bottled water, fizzy drinks, excess meat, dairy products, processed foods and stress. These acid forming foods & drinks deplete our already limited reserves of vital minerals that can result in causing disease.

3. Antioxidants

Antioxidants slow down ageing and degeneration. Free radicals cause disease and are produced by normal cell function and environmental exposure. These free radicals are effectively mopped up by drinking antioxidant water. Is your drinking water an antioxidant? Find out by using an ORP Meter. →

7.0pH "Clean Neutral Water"

This water has been run through the filter of the Enagic unit but not the electrolysis process which means this water does not get electrically charged like the 8.5, 9.0, 9.5 pH Kangen Alkaline Waters. This water can be used for taking medication and baby formula.

Measuring ORP means measuring if a substance is...

oxidative...
(ageing you)

or

Anti-oxidative
(slows down ageing)
